## AFN Pacific Direct To Home on Koreasat 5A Cisco 9865 Decoder Settings and Channel Guide

You must access the decoder settings “Tuning/Preset” menu to update your decoder settings. Start from the “Main Menu” and select the “Setup Menu.” Then select “Tuning / Preset” to access the 11 individual settings you need to verify in order to get digital programming. Note that not all settings may have to be changed.

### IMPORTANT INFORMATION

Verify the five settings in graphical example to the left.

#### NOTE

Enter the NetID number as 00020

Highlight “Save” and select “Ok” when prompted to save the decoder settings.

## AFN Pacific Direct To Home on Koreasat 5A Cisco 9865 Decoder Settings and Channel Guide

This programming is available to AFN Direct to Home and AFN Satellite Network (SATNET) customers in the Pacific and East Asia.
